

CRIOCM2018

23rd International Symposium on Advancement of Construction

Management and Real Estate

(24th- 27th August, 2018, Guiyang, China)

Call for papers (1st Announcement)

Urbanization is a main development strategy particularly in developing countries throughout the world. Rural revitalization, regional coordinated development, new-type urbanization pattern, and coordinated development between small towns and cities are among those core agendas. In this context, the advanced theories, technologies and methods of construction management and real estate play the key roles in this new era of urbanization.

In line with this background, the CRIOCM2018 23rd International Symposium on Advancement of Construction Management and Real Estate is designated with the aim of sharing the most updated research findings and practices on construction management and real estate between scholars, professionals and practitioners internationally. This symposium will be held in Guizhou Institute of Technology (GIT), which is located in Guiyang, the provincial capital of Guizhou Province of China. Established as a tertiary education institute in 2013, GIT is a state-run fulltime college offering programs within the main disciplines of Engineering, Science, Management and Economics. The Institute has a population of about 12000 students and 820 staffs. GIT adopts the OBE (Outcomes Based Education) engineering model by following its motto “Knowing and doing for goodness, spurring with long accumulation”, with the aim of providing high-qualified professional talents.

Guiyang, the summer paradise of China, is named as the first national forest city. It is an ideal place for international conferences. The Global Annual Conference of Eco Forum has been held in Guiyang for many times. We welcome you to CRIOCM2018, to Guiyang, the summer paradise!

Main Themes

The symposium will cover the following main themes:

CM01: New-type urbanization

CM02: Land development and land use

CM03: Urban Planning and Infrastructure Construction

CM04: Housing Market and Housing Policy

CM05: Real Estate Finance and Investment

CM06: New Theories and Practices on Construction Project Management

CM07: Smart City

CM08: BIM Technologies and Applications

CM09: Construction Management in Big Data Era

CM10: Green Architecture and Eco-city
